Oracle Traders Registration Closes For The General Public

Learn this powerful [Fibonacci Retracement](#) method FREE that pulls 500+ pips per trade. Get these [Forex Scalping](#) Cheatsheets plus the 10X Scalping System FREE. Download the [Oracle Trader](#) FREE for the limited time only. I just got word that OracleTrader registration has CLOSED for the general public. The OracleTrader team hit the maximum number of traders allowed to register, so registration closed earlier than initially expected. However, I got numerous emails from people asking if there was any way to keep registration open a bit longer, and Dustin has agreed to accommodate my special request on your behalf.

After all, it's not often you can get an industry-leading software and training package worth over \$15,200, for just \$2,470 - especially one with a four year track record of success! If you registered, then consider yourself lucky - the software and service does everything they said it does - and I ought to know - I am now using it too! If you don't get to register, you have my apologies, but you had plenty of notice.

By the way, the UK Retail Sales news release yesterday was astounding - over 100 pips of movement, and many new OracleTrader users made back their entire investment! And now they have 12 months of pure profits (gravy!) to look forward to! So a sincere "Thank You" to everyone who took part and made this one of the most successful launches in the history of FOREX. Get your registration in now! The next launch is a few months away and they have informed me that the price is going up SIGNIFICANTLY, so don't wait!

In light of Thursday morning's developments, I just talked Dustin Pass into keeping OracleTrader registration open for anyone on my email list - which means they will accept your registration if placed by close of business TODAY - Friday! Here is the special link to lock on the massive discount for the huge OracleTrader package that Dustin has put together for you:

You probably heard what happened on Thursday morning's UK Retail Sales new release..the trade was a MAJOR market mover, and for OracleTrader users it was like winning the lottery! Thousands of dollars were made in just seconds! The payouts were sweeeet.. traders reported making over 100 pips with OracleTrader - many covering their initial investment on this trade alone. Very nice. I can't make it any more clear to you that this strategy works, but tomorrow it's gone, so act immediately to get in.

When they open registrations in a few months, the price will be much higher, so this is the time to act. Don't get shut out on such an easy and lucrative way to trade. You should carve out some time this weekend to watch an exciting and extremely informative webinar replay. It's three solid hours on intense news trading training and education! I guarantee you will get a ton out of it and be a much better trader for having watched it! If you haven't gotten onboard with OracleTrader yet, you may not get in. Registrations have been flowing non-stop and we are almost at capacity.
